Summary

Technical Product Manager & Team Lead with 5 years' experience in full-stack and AI development. Directed 15-person squads, drove roadmap, backlog and release cycle. Launched 4+ products at 96%+ uptime; cut time-to-market 40%; improved reliability/scalability 30%. Data-informed, stakeholder-driven, goal-oriented.

Education

Rathinam Technical Campus, Coimbatore

Bachelor of Engineering, Computer Science

- **GPA:** CGPA: 8.5/10.0

May 2016 - May 2020

Sree Narayana HSS, Kerala

Intermediate

- **GPA:** CGPA: 8.4/10.0

May 2014 - Dec 2016

Work Experience

SkySecure

Technical Lead (Acting Product Owner)

Apr 2025 - Oct 2025

Bangalore

- Led a **15-member** cross-functional team (developers, testers, DevOps, UI) to deliver scalable, high-performance software on time and within budget.
- Exceeded client expectations, delivering **4+ products** (Marketplace, SOC Agent, RCA Agent, IT Helpdesk Agent) with **96%+ uptime**.
- Increased client engagement and add-to-cart rate by **30%** and drove a **12% revenue** uplift by deploying an AI-enabled **agentic chatbot** to guide product selection and checkout.
- Drove **Agile and Scrum** processes, facilitating sprint planning, retrospectives, and code reviews to ensure high-quality deliverables.
- Managed major clients including **Microsoft, Indegene and IBM**; defined vision, product strategy and end-to-end delivery of agent solutions.
- Architected and implemented microservices-based systems using **Node.js, Python**, improving system reliability and scalability by **30%**
- Introduced **CI/CD** pipelines and structured release cadence across teams; reduced time-to-market by **40%** and accelerated product iteration.

Arizona Systems

Senior Software Engineer

Feb 2023 - Present

- Created a reusable React component library that accelerated development cycles by 40%
- Spearheaded MongoDB to SQL database migration, boosting query performance by 20% and enhancing data access patterns
- Led 6-member development team delivering 3 major releases with 97.9% uptime
- Established a mentorship program that reduced onboarding time by 25% through structured training sessions
- Developed a rapid prototyping system for technical feasibility validation, enhancing project planning efficiency
- Collaborated with cross-functional teams to enhance testing protocols and marketing strategies, significantly elevating project outcomes
- Utilized React.js, Node.js, TypeScript, MongoDB, SQL, Prisma, and Express to develop scalable web applications, enhancing user experience and system performance

SmartQ

Frontend Engineer

Nov 2021 - Jan 2023

- Created and implemented four React.js features that improved user engagement by 45% through enhanced interactivity and streamlined functionality.
- Developed and deployed a robust responsive design system that elevated mobile user satisfaction scores by 60%, demonstrating a substantial improvement in user feedback and overall engagement.
- Streamlined front-end architecture, cutting application load time by 40%, leading to a boost in user satisfaction and improved UI functionality.
- Successfully refactored API endpoints and implemented a caching strategy to reduce response times by 40%, significantly enhancing application speed and improving user satisfaction.
- Developed and maintained web applications using React.js, Python, Firebase, MongoDB, Node.js, and Express, resulting in improved application performance and user experience

Full Stack Development Intern

- Created a full-stack IMDb clone application using JavaScript technologies, improving user satisfaction and engagement.
- Enhanced database architecture and RESTful API integration, boosting data retrieval speed and system reliability.
- Developed a cross-platform mobile application with the Flutter framework, enhancing accessibility and expanding user reach.
- Implemented Redux state management patterns, delivering smoother interactions and 20% faster page transitions
- Utilized React.js, Node.js, Flutter, MongoDB, Express, Tailwind CSS, and Bootstrap to improve app performance and user interface design.

Skills

- **Product:** Sprint/Agile Execution, JIRA / Confluence , PRDs & User Stories, Stakeholder Comm, Road-mapping, Release Planning, Go-to-Market Strategy, Experimentation & A/B Testing, Effort Estimations
- **Technical Stack – Frontend & Backend::** React.js, TypeScript, Node.js, Prisma, SQL, MongoDB, Gen AI, Cursor, AI Tools, Figma, Firebase
- **Architecture & Delivery:** Microservices, Monolith, System Design, CI/CD (GitHub Actions), Test Automation (Playwright)
- **Tools & Platforms:** Azure, Git, Jira, Bitbucket, Azure DevOps, AWS, UI Frameworks (MUI, Tailwind, Bootstrap), Flutter , Electron, Ai Foundry

Languages

- English (Proficient)
- Hindi (Proficient)
- Tamil (Proficient)
- Malayalam (Proficient)

Achievements

- Released a new npm package: react-native-ocr-scanner: <https://www.npmjs.com/package/react-native-ocr-scanner>
